There now looms up brightly "Skynhisach," a peroxide oream, composed mostly of Earth Alkailne Peroxides and which contains no acids or injurious aubstances of any kind.

It does its work by reason of the fact that when rubbed on the skin previously moistened with warm water, the free and active oxygen which thereby becomes released not only bleaches the skin, but thoroughly disinfects as well. The person afflicted with discolored skin and wishing to obtain toat creamy white skin so much to be desired will find Skynblesch a most valuable, efficient, and simple preparation to use.
